DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-7 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 8-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 7 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

4. Claims 1 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Topsoe (US 2003/0087161).

Topsoe teaches a nonaqueous electrochemical cell comprising a first electrode and a second electrode and an electrolyte. The cell includes an unsaturated cyclic carbonate to reduce the concentration of HF formed by reaction of the electrolyte salt with the residual water. Topsoe teaches on page 4, [0062], that the positive electrode can be LiCoO₂, LiNiO₂ or LiMn₂O₄. Topsoe teaches on pages 3-4, [0059-0060], that

Art Unit: 1745

the electrolyte can be a liquid or can be immobilized by addition of a suitable polymer such as polymers including cellulose derivatives and polyvinylpyrrolidone and that the salt can be LiPF₆, LiBF₄, etc. Topsoe teaches on page 3, [0046], teaches that the sealing material may be temperature sensitive packaging material such as ethylene acrylic acid copolymer or a heat sealable plastic comprising polyethylene and polypropylene. Topsoe teaches on page 5, Examples 2, 3 and [0096], that the HF content ranged from 19.0-25 ppm when drying at 95 degrees C. The conclusion can be drawn that the lowest HF content measured directly after initialization can be achieved by drying at 95 degrees C.

Allowable Subject Matter

5. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
